

Purchase of Class 4 Pesticides for Use on Agricultural Operations by Farmers Who Are Not Certified

Class 4, 5, 6 or 7 pesticides may be purchased for use on farms by farmers who are not certified through the Grower Pesticide Safety Course.

To buy Class 4 pesticides, a farmer must provide the vendor with his/her Farm Business Registration number **OR** a signed copy of the Ontario Ministry of the Environment (MOE) form titled “Farmer Self Declaration to Enable Purchase of a Class 4 Pesticide” on which a farmer declares that s/he is a farmer as defined under the Reg. 63/09.

The form is available through the Ontario Ministry of the Environment’s web site at **www.ene.gov.on.ca/en/land/pesticides/index.php**

Your pesticide vendor will know which Class 4 pesticides they sell, and they may help you plan your pest management program based on Class 4 pesticides. There are over 700 herbicides, insecticides and fungicides in Class 4.

You can search for a pesticide’s Class or find a list of the pesticides in each Class on the Ontario Ministry of the Environment web site at **www.ene.gov.on.ca/en/land/pesticides/class-pesticides.php**
